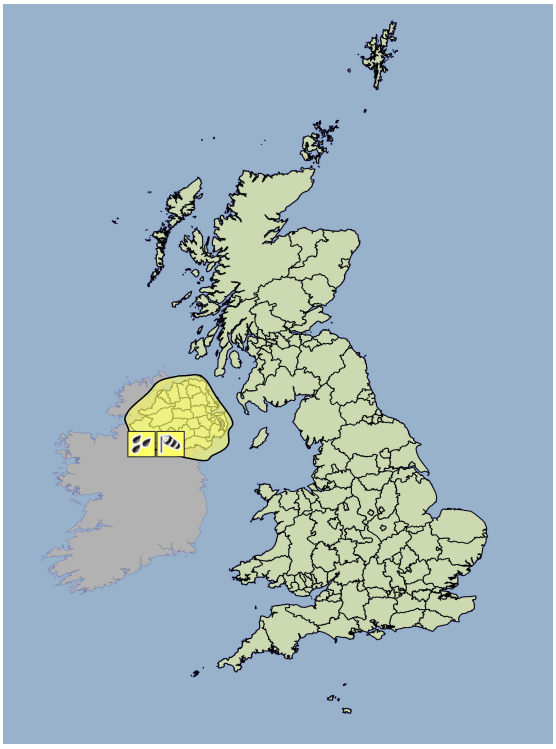
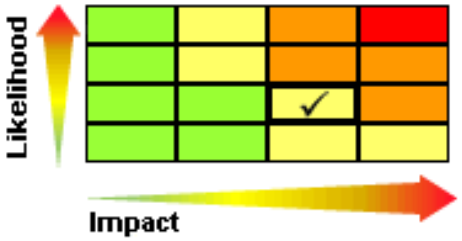
National Severe Weather Warning Service





Chief Forecasters Assessment
After a brief lull in the weather on Thursday evening, another area of low pressure is expected to track north across Northern Ireland through the early part of Friday. Further heavy rain is likely with this system. Furthermore, south-easterly gales or severe gales are likely, especially, but not exclusively near coasts.

The Met Office have issued a **Yellow Warning** of **Rain and Wind**

Valid from **00:15 on Fri, 14th Nov 2014** until **10:00 on Fri, 14th Nov 2014**

An area of low pressure is expected to move north across the Republic of Ireland during Thursday evening, reaching Northern Ireland in the early hours of Friday, before clearing to the north later on Friday morning. A band of heavy rainfall is expected to develop in association with this system, and push quickly north through the morning. Rainfall totals of 10-20 mm can be expected, with as much as 30-40 mm over higher ground.

The low pressure system will also be accompanied by gales or severe gales, particularly in the north and east, where gusts could reach 60-70 mph.

Following the wet weather of preceding days, the public should be aware of the risk of localised flooding. Furthermore, damage to trees and some structures is possible in association with the strongest winds.
